ColdFusion Developer (Entry-Level)

Company: Lifepoint Informatics

Location: Glen Rock, NJ

Employment Type: Full Time

Lifepoint Informatics is a healthcare IT company serving the specific needs of Laboratories, Hospitals, and Health Networks. Our products (software) and services enable labs to connect with their customers, add value to their service offerings, and increase competitiveness. Lifepoint is seeking a self-starter who will prepare computer programs by translating specifications into code (unit testing code) and manage code repository and test databases. Applicants should have strong problem solving skills, persistence, software performance tuning, attention to detail, software development fundamentals, software documentation, technical zeal, independence, and thoroughness.

Requirements:

- Bachelor's degree in Computer Science
- Mach-II, Subversion, Eclipse experience preferred
- 1-2 years experience
- Information analytical skills

Description:

- Plan program by studying specifications
- Maintain internal proprietary source code management products
- Arrange specifications by developing logical sequence, preparing flowcharts, and researching solutions
- Encode specifications by developing logical sequence and workflow into program language
- Verify encoding by performing trial runs and modifying code
- Prepare program reference by documenting control language
- Advanced job knowledge to next level by participating in educational opportunities and reading professional publications
- Accomplish department and organization mission by completing related tasks as needed

To Apply: Email resume and cover letter to careers@lifepoint.com (PDF Format preferred)
